EDUCATION

- **STIMIK ESQ** | Bachelor of Degree, Computer Science August 2021- August 2025
GPA: **3.68** / 4.00
- **Bangkit Academy** | Independent Study at Kampus Merdeka
Machine Learning Specialist – Graduate (Average Score **90.87**) August 2023- January 2024

WORKING EXPERIENCE

- **Backend Developer Intern**
Airnav Indonesia Nov 2025 - Present
Developed an event management API using Laravel, creating CRUD endpoints and an auto-generate certificate feature with dynamic names and numbers. Designed Role-Based Access Control (RBAC), integrated Minio object storage utilizing presigned URLs, and implemented an image compression feature.
- **Backend Engineer Intern**
DOKU, PT Nusa Satu Inti Artha Nov 2024 - May 2025
Maintained Payment Gateway service stability by fixing issues in Kafka Listener and resolving cache problems in Redis for various payment methods. Enhanced user functionality and security by implementing transaction details feature and integrating a Risk Engine into the Isaku payment channel. Initiated system modernization through technical exploration of Spring Boot and gRPC to support the development of more observable features in the future. Ensured project clarity and alignment by updating OpenAPI documentation and collaborating cross-functionally using Jira and Confluence.
- **Backend Developer Intern**
SchoolTech Indonesia Apr 2024 - Jul 2024
Developed RESTful APIs for a School Management System using Laravel, including the implementation of JWT authentication, an Admin Dashboard, and API versioning. Performed bug fixes, managed database relationships, and ensured optimal system performance. Collaborated within a team using ClickUp for project management and GitHub for version control.
- **Machine Learning**
Bangkit Academy Project Based November 2023 - January 2024
Create Machine Learning models using TensorFlow, applied Machine Learning models with web service API, and collaborated with an Android development and cloud computing team to create a financial management application with machine

learning-based analysis features.

- **Data Analyst Intern**

PT Arga Bangun Bangsa (ESQ Group)

August 2023 - October 2023

Processed and cleaned transaction data from multiple databases. Conducted exploratory data analysis using MySQL and Power BI to unify datasets, remove inconsistencies, and create visual reports that supported improvements in ESQ training sales.

LEADERSHIP EXPERIENCE

- **Google Developer Student Club at UIN Jakarta**

April 2024

Mentor of AI/ML Weekly Class

Took a leadership role as a mentor, actively contributing to and driving strategic decision-making processes for final project.

SKILLS

- **Hard Skills:** Web Services API, Machine Learning, Java, Python, PHP, Spring Boot, Tensorflow, Flask, Laravel, Docker, SQL, Docker, Git.
- **Soft Skills:** Adaptibility, Responsibility, Communication, Teamwork, Discipline and Planning
